

Protect What Matters Most

Your all-in-one solution to manage risk, reduce data loss, and increase regulatory compliance

In today's data-driven world, privacy and security are non-negotiable. uRISQ is a comprehensive solution designed to empower organizations of all sizes to manage privacy and security risks with confidence. Whether you're looking to meet compliance requirements, reduce exposure to threats, or strengthen internal controls, uRISQ brings a proactive approach to data protection—built around six powerful modules.

THREAT SCANNING

Detect vulnerabilities and data exposures in your website and firewalls

EMPLOYEE TRAINING

Empower your staff with recurring cybersecurity and privacy training

POLICY CENTER

Simplify governance and easily build organizational policies and plans

BREACH SUPPORT

Access expert support to navigate breach reporting and notification obligations

VENDOR MANAGEMENT

Know who you are working with, assess, manage and reduce your risk of data exposure

ACCESS REQUEST

Simplify intake, tracking, and fulfillment of consumer data access and deletion requests

"uRISQ helped us quickly meet requirements for applying for cyber insurance and it helped our business operate with better privacy and security practices."

"We had issues with employees clicking on phishing emails. uRISQ makes training our team easy and now they are more aware and careful. It's made a difference."

"Thank goodness we had Breach Support. We had no idea what to do. uRISQ's Breach Support guided us every step of the way and we confidently reported within the time requirement."
